Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on July 20, 2006 has been entered.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on July 20, 2006 was filed after the mailing date of the Notice of Allowance on April 20, 2006. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Hayes lever assembly.

Hayes discloses a control lever assembly, comprising: a control lever support configured to be connectable to a handlebar assembly of an associated vehicle, said support having an upper flange and a lower flange defining a space there between (see Fig), said upper flange defining an upper bore and said lower flange defining a lower bore, said upper bore and said lower bore aligned with one another along a pivot axis of said control lever assembly; a control lever defining a finger grip portion and a mount portion, said mount portion defining an upper surface and a lower surface, a distance between said upper and lower surfaces sized such that said mount portion is receivable within said space, said control lever additionally comprising an upper shaft portion extending from said upper surface and a lower shaft extending from said lower surface, said upper shaft portion being supported within said upper bore and said lower shaft portion being supported within said lower bore when said lever is rotatably supported by said support, wherein said upper shaft portion and said lower shaft portion are configured to rotate with the control lever relative to the control lever support (see Fig), where said upper shaft portion and said lower shaft portion are configured to be removable from, and capable of reassembly to, said mount portion of the control lever (inherent).

Even though product by process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product by process claim is the same as or obvious from a product of the prior art, the claim is

Art Unit: 3682

unpatentable even though the product was made by a different process. See MPEP 2113.

Allowable Subject Matter

5. Claims 5-19 are allowed.
